

ESCFXS – INACTIVE WAREHOUSE ITEM PURGE

ESCFXS looks for type S items in the item file that have no matching warehouse record and turns them into type P items. A report can be run prior to updating to view the items to be deleted. A report will also run when you chose to update – if you would prefer not to have a report print then you must enter KILL in the print queue when updating.

- * THIS FRAME PROGRAM WILL READ IVR TYPE 'S' THEN MATCH TO IWR FILE
- * IF NO WHSES EXIST REWRITE IVR TYPE AS 'P'.
- * ITEMS MAY BE ACCESSED BY LINE BUY RANGE.

```
ESCFXS RETURN=NCS900 TSS          IF NO MATCH S TO WH CHG TO P          ATTENDED
NUM COMMENT----- PRINT-QUEUE COPIES  STATUS----- JOBSTREAM STEP
                                         INCOMPLETE

FROM/TO LINE BUY:          _____ ZZZZ

UPDATE (Y/N) :             N          (N=REPORT ONLY MODE, Y=REPORT/UPDATE MODE)
```
