

## TRAK01 – ORDER TRACKING APPLICATION

This is a simple barcode application that allows a distributor to track the progress of an order through its various stages by scanning bar-coded event codes. The scan also captures user data and is written back to the Quality System in Array™.

```

EXPERT SYSTEMS CONSULTING
*** TICKET-TRAK ***
PROGRAM NAME: TRAK01

CURRENT USER: TRAIN - TSS (F2 TO EXIT PROGRAM)

TICKET NO.: 189498300

CUSTOMER: 100315-0000 TEST ADDRESS
SALESPERSON: TSS

SHIP-TO: TEST ADDRESS
          TEST STREET

          TEST OH 555555

EVENT CODE: 8040 ORDER DELIVERED

COMMENT: ORDER DELIVERED AS REQUESTED

ADD EVENT RECORD? Y TO ADD, C TO CANCEL. _
  
```

After signing into the application the user types the ticket number including the release number with no dashes. The delivery information is displayed and a prompt for the event code. After typing the event code the event description is displayed and you have the option to add a comment. After completing the process the event is automatically logged in the Quality Event database.
